About Me

A hands-on experience in crafting intuitive and visually appealing digital experiences.
With a solid foundation in software engineering acquired through my Bachelor's degree, I bring a unique blend of technical expertise and design proficiency to every
project I undertake.
My journey in the realm of user interface and user experience design has been driven by a relentless pursuit of excellence in creating products that seamlessly blend functionality with aesthetics. I thrive on understanding user behaviors, empathizing with their needs, and translating insights into innovative design solutions that elevate the overall user experience.
Throughout my career, I've had the privilege to collaborate with cross-functional teams, ranging from developers and product managers to marketing specialists, fostering a culture of creativity, collaboration, and continuous improvement. Whether it's wireframing, prototyping, or usability tests.

Work experience

UI/UX DESIGNER   *June 2023 - present*

Self Employed

* Requirement Gathering
* User Research
* Wireframing: Create wireframes or low-fidelity prototypes to outline the layout, structure, and functionality of the user interface.
* UI Design: Develop high-fidelity UI designs using tools like Figma, Adobe XD, or Photoshop. Create visually appealing interfaces that align with brand guidelines and design principles.
* Prototyping: Build interactive prototypes to simulate user interactions and test design concepts.
* Usability Testing: Conduct usability testing sessions with target users to evaluate the effectiveness and usability of the interface designs.
* Collaboration
* Iterative Design

HEAD OF DESIGN/PRODUCT   *January 2021 - February 2022*

Orica - Vienna

1- Project Planning and Strategy: Work with stakeholders to define project requirements, objectives, and design strategies for blockchain initiatives.
2- Design Research and Analysis
3- Blockchain User Experience (UX) Design: Lead the design of user-friendly intuitive interfaces for blockchain NFT marketplace, and other decentralized applications (dApps).
4- User Interface (UI) Design
5- Prototyping and Wireframing: Develop wireframes, prototypes, and mockups to visualize and iterate on blockchain designs. Use prototyping tool (Balsamiq& Miro)

PRODUCT/DESIGN MANAGER   *June 2021 - January 2022*
SpoonFeed - Vienna

* User Interface (UI) Design: Leading the design of the CMS user interface to sure it is intuitive, visually appealing, and easy to use for content creators and administrators.
* Customization
* Performance Optimization: Monitoring and optimizing the performance of the CMS to ensure fast page load times, efficient content delivery, and scalability.
* Continuous Improvement

USER INTERFACE DESIGNER   *January 2020 - December 2021*
Golden Process

* Wireframing and Prototyping, - Jisual Design, - Interaction Design, - Usability Testing
* Feedback Incorporation: Actively seeking feedback from stakeholders and users and incorporating it into the design process to continuously improve the quality and usability of the interface designs, To ensure that the final product meets user needs and business goals effectively.

PROCESS MANAGER   *January 2019 - December 2021*
Hrvatski Crveni križ - Zagreb

* Monitoring Processes* Process Improvement* Documentation* Risk Management* Continuous Improvement

PROCESS MANAGER   *January 2016 - December 2017*
pezhvak alborz

* Monitoring Processes* Process Improvement* Documentation* Risk Management* Continuous Improvement
